

HUBUNGAN KEBERADAAN KOMUNITAS SEL DAN POLA KEPEMIMPINAN KRISTEN DENGAN PERKEMBANGAN KARAKTER ANAK MUDA BERDASARKAN 1 TIMOTIUS 4:12 DI GEREJA BETEL INDONESIA TANJUNG DUREN JAKARTA

ABSTRAK

Karakter penting dalam setiap aspek kehidupan, demikian pula dengan anak muda. Karakter seorang anak muda dapat dilihat dari perkataan, tingkah laku, kasih, kesetiaan dan kesucian mereka. Seharusnya anak muda sebagai makhluk ciptaan Tuhan yang diciptakan menurut gambar dan rupa Allah, memiliki karakter yang mulia. Akan tetapi pada kenyataannya tidaklah demikian. Anak muda yang masih dalam tahapan mencari jati diri, perkembangan karakternya dipengaruhi oleh lingkungannya. Gereja memiliki komunitas sel, yang seharusnya menjadi wadah untuk perkembangan karakter anak muda. Selain itu adanya pemimpin yang memiliki pola kepemimpinan yang berbeda-beda turut mempengaruhi perkembangan karakter anak muda. Melalui metode kuantitatif, peneliti berusaha meneliti hubungan keberadaan komunitas sel, dan pola kepemimpinan Kristen dengan perkembangan karakter anak muda di GBI Tanjung Duren. Didapati bahwa hubungan keberadaan komunitas sel memiliki nilai positif, kuat dan searah, dengan perkembangan karakter anak muda. Pola kepemimpinan Kristen juga memiliki nilai positif, kuat dan searah, dengan perkembangan karakter anak muda. Ketika kedua variabel tersebut digabungkan, ternyata memiliki nilai positif yang lebih kuat dengan perkembangan karakter anak muda. Hal ini berarti bahwa selama komunitas sel terjaga kualitasnya, dan pola kepemimpinan Kristen diterapkan dengan benar, maka perkembangan karakter anak muda di GBI Tanjung Duren akan meningkat.

Kata Kunci: perkembangan, karakter, komunitas, kepemimpinan

ABSTRACT

The Character is important in every aspect of life, as well as young people. The character of a young person can be seen from their words, behavior, charity, faith and purity. Young people as God's creatures, who are created in the image and likeness of God, should have a noble character. But the reality it is not. Young people who are still in the stage of finding their identity, their character development is influenced by their environment. The church has a cell community, which should be a place for the development of the character of young people. In addition, the existence of leaders who have different leadership patterns also influences the development of the character of young people. Through quantitative methods, researchers tried to examine the relationship between the existence of cell communities, and Christian leadership patterns with the character development of young people at GBI Tanjung Duren. It was found that the relationship between the existence of the cell community has a positive value, is strong and unidirectional, with the development of the character of young people. The pattern of Christian leadership also has positive values, is strong and unidirectional, with the development of the character of young people. When the two variables are combined, it turns out to have a stronger positive value with the development of the character of young people. This means that as long as the quality of the cell community is maintained, and the Christian leadership pattern is applied correctly, the character development of young people at GBI Tanjung Duren will increase.
